

(Building Construction Technology Associate of Applied Science Degree Path)

This certificate program is designed to equip students with the basic carpentry skills necessary to enter the construction industry. Through a blend of classroom theory and hands-on experience, students will be introduced to hand tools, power tools and other equipment commonly used in the industry. Lumber, concrete, and a variety of other materials and hardware, as well as math, blueprint reading, and cost estimation techniques will also be covered.

This certificate program is designed to prepare students for success in careers in the building construction industry, one of the largest industries in the United States today. The skills of a well-trained carpenter are in high demand. This program is well-suited for individuals who enjoy working with their hands in both indoor and outdoor

Associate of Applied Science Degree Requirements (Minimum 62 credit hours)

An Associate of Applied Science Degree is offered for those enrolled in or completing an Apprenticeship, Employee-In-Training, or Applied Technology General Certificate Program. Other College requirements apply, including the completion of the general education requirements, as well as attaining a minimum overall total of 62 credit hours. See Apprentice Coordinator or Advisor for details.

Students may graduate with an Associate of Applied Science Degree in Manufacturing Technology, Maintenance Technology or Building Construction Technology, depending on the Apprenticeship, Employee-In-Training or Applied Technology General Certificate Program area of specialty.
